

Brewing Innovation with SAP Business One®

Before: Challenges and Opportunities

- Traditional and manual business processes at back-end
- Need for integrated ERP system that can track all transactions as business grows
- Lack of automation and traceability meant a reliance on paper-based recording

Why SAP Partner and Solution

- Affordable and cost-effective
- SAP Business One provides comprehensive capabilities and seamless integration with add-ons
- SAP Business One and its modules are intuitively laid out and easy to use
- Reduction in administrative work and IT costs
- ABS' customer references were reliable and gave excellent feedback
- ABS is local and understands the dynamics of growing businesses that are in need of an advanced system

After: Value-Driven Results

- Major savings in time and effort
- SAP Business One helps ensure that data is available in real time and reports are consistent across all operations
- SAP Business One is an end-to-end business solution that drives faster response to market.

“We have gained great advantage partnering with ABS; a company that helped us gain precise control over operations which significantly facilitates our decision making process. ABS assisted us in resolving technical issues we faced during implementation and continuously ensures that our operations are running smoothly.”
