

Supporting Iraq's energy sector with SAP® Business One's process streamlining.

A leading Iraqi company that offers a wide range of oil and gas products and services in Iraq; Al Majal, reached out to ABS for a solution that could unify their systems onto a single platform. The implementation of SAP Business One has greatly enhanced organization-wide visibility and tracking.

Before: Challenges and Opportunities

- The legacy systems covered different parts of the organization and did not effectively manage the growing warehousing operations.
- Reporting required compiling on a periodic basis often maintained through spreadsheets which were consolidated at the end of the month.
- New software was required that could integrate reporting and streamline processes for Al Majal Group.

Why SAP and ABS

- Al Majal Group found SAP Business One to be a superior solution to the other ERP systems that were considered.
- The costs for SAP Business One were in line with Al Majal Group's allocated budget.
- ABS had an excellent team and provided top of the line coaching.
- ABS provided an add-on to integrate the logistics and consolidation of costs for the fleet.

After: Value-Driven Results

- Thanks to SAP Business One, accuracy has been improved and reports made available at a click.
- Financial transactions have been greatly streamlined with the presence of real-time data and a clearly defined approval process.
- HANA's performance in driving real-time decision making and the security provided by the Cloud have been excellent.

“Integrating SAP Business One as part of operations has greatly improved our visibility and control.”
