

# Providing Sustainable Energy with SAP Business One®

A Masdar company and a provider of renewable energy in Jordan, Baynouna Solar Energy worked with ABS to implement SAP Business One. Clear visibility and company wide integration has resulted in reduced turnaround times since implementation.

## Before: Challenges and Opportunities

- The original system was online, leading to concern about security aspects.
- The legacy system required high maintenance and constant IT support.
- New software was required that could customize reports and eliminate delays.

## Why SAP and ABS

- Baynouna Solar Energy had experience with SAP beforehand and believed SAP Business One would fulfill requirements.
- SAP Business One allows communication and integration with international systems.
- ABS provided excellent training and have a strong technically sound team.

## After: Value-Driven Results

- Increase in productivity thanks to a user-friendly system that does not require intensive training.
- Customized reporting options have helped decrease turnaround times.
- Departments have been integrated and real-time data is now available at all locations.
- HANA's analytics provide clear visibility into the business operations, providing an essential decision-making tool.

“SAP Business One is an excellent **international solution** that covers all our needs.”

Mr. Mohammed Al Masri, Senior Accountant, Baynouna Solar Energy
