

Contributing to a Sustainable Future with SAP Business One®

Before: Challenges and Opportunities

- Delay in receiving data from other departments to Accounting and Finance = less time efficiency
- Little integration, communication or information sharing between departments
- Desire to go for a more advanced ERP system to facilitate daily operations as local system was not efficient enough

Why SAP Partner and Solution

- Advanced Business Solutions' strong track record and expertise in the manufacturing industry
- Excellent customer references and feedback pertaining to ABS support team and transition process
- World renowned and affordable SAP solution. Customizable according to our business needs, and the only solution that fits Hanania's specific needs

After: Value-Driven Results

- More visibility in Finance department which results in real time financial reports. Better profitability, lower costs of operation and better efficiency
- CRM department able to monitor customer behavior based on real-time data
- Logistics department able to track material quickly and easily. Reduced cost in inventory counting (waste management).

“After a long search and countless interviews with ERP providers, we found that SAP Business One was the only ERP system that fits our specific operations and needs. We chose ABS amongst many other local and international partners because of their goodwill and expertise in the field of manufacturing.”
