

Producing Household Products with SAP Business One®

Before: Challenges and Opportunities

- Company was facing difficulties in handling complex spreadsheets to manage the supplies and production
- Information flow was restricted
- Coordination among the departments was unmanageable.

Why SAP Partner

- Easy to use for everyone (from CEO to Warehouse manager)
- Standardized, fully automated solution
- Easily configurable software, enabling company to accommodate different business units, statutory, and process requirements
- SAP Business One provides the company with better control and valuable insight to identify new opportunities to cut costs, grow profits and expand the business

After: Value-Driven Results

- Improved data reliability, powerful reporting tool & delivered fast ROI (~1 year)
- Prepared for further expansion in a new and emerging market
- Reduce administrative work and reduction in IT costs
- Company has enhanced customer service
- Positioning of company to grow without limiting ERP functionality & scalability
- With critical business information easily available, management now has an improved insight into the current operating status of the business.

“We were searching for an affordable solution to manage the entire company. We trusted ABS and invested in SAP B1 and its broad capabilities. Since then, we have created an inspiring business environment where we are able to have complete control over every aspect of our operations, respond faster to our customer needs and support the company’s growth.”
