

Manufacturing Traditional Desserts with SAP Business One®

Before: Challenges and Opportunities

- Traditional and manual business processes at back-end
- Lack of systematized operations
- Taking Sales Orders over the phone, no tracking or documentation
- Before choosing SAP Business One, Zalatimo used to store recipes and crucial data in excel sheets

Why SAP Partner and Solution

- SAP Business One offers a clearer look into the company and better overall control, helping to identify new opportunities to reduce costs, increase profits and expand the business
- Easy to use across all departments
- SAP Business One is an integrated and unified program that includes all operations required across all company departments
- Sales Orders are now done through the system with clear visibility and traceability, which allowed Zalatimo to track financials

After: Value-Driven Results

- Major savings in time and effort
- Provides powerful reports in real-time
- Enhanced customer service
- Ability to manage huge data at high speed
- Ability to monitor staff performance using accurate and timely information.

“I am pleased to have had the opportunity to work with ABS’ team of experts who have sufficient experience in implementing the program to adapt to the nature of the company's work. With their help and support, we were able to execute our work on time and in full accuracy.”

Abdallah Zalatimo, General Manager, Zalatimo Sweets Co.
